ARE YOU LOOKING FOR A JOB?

Orbital CS is a Spanish company that has become a leader in critical systems engineering.

It’s looking for software engineers for a project where we provide support to an important aerospace company in Germany. We are looking for passionate, self-motivated software developers to work as part of development team with tasks related to critical software development and verification & validation activities.

We expect at least 2 years of experience in software development in C/C++, validation tasks, and experience with safety critical software development based on DO-178 standard.

University engineering degree, fluent English and good documentation skills is a must.

If you are interested to get more information about the process send your CV to ssanchez@orbitalcs.com
